DETAILED ACTION

This action is in reply to the communication filed on 10/27/2009.

Claims 14-21, 50-57 are pending and have been allowed.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bradley DeSandro (Reg. No. 34,521) on 13 January 2010.

The application has been amended by canceling claims 58-65.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The claimed invention pertains to a method of generating a verification number which is used to verify, by a service provide, mobile electronic device (i.e. smart card) transactions conducted at a point of sale terminal.

In addition to arguments made by Applicant in the response dated 10/27/2009, which the Office finds persuasive, the art of record fails to teach, to the same level of specificity, the sequentially recited steps, in claimed in generating the verification number as follows:

- creating a base record comprising:

- digits for an application transaction counter overlaying the left most digits of a primary account number corresponding to an account upon which the transaction is being conducted, wherein the application transaction counter is incremented for each said transaction; and
 - concatenated to the right most digits of the primary account number:

- a card security code for the primary account number; and

- an expiration date for the primary account number;

- bisecting the base record into a first field and a second field;

- encrypting the first field using a first encryption key;

- performing an exclusive-OR (XOR) operation on the encrypted first field and the second field to produce a first result;

- encrypting the first result using a second encryption key to produce a second result;

decrypting the second result using a decryption key to produce a third result; encrypting the third result using a third encryption key to produce a fourth result;

sequentially extracting each value between 0 and 9 from the most-significant digit to the least-significant digit of the fourth result to produce a fifth result;

sequentially extracting and subtracting hexadecimal A from each value between hexadecimal A and hexadecimal F from the most-significant digit to the least-significant digit of the fourth result to produce the sixth result;

concatenating the fifth result and the sixth result to produce a seventh result; and selecting one or more values from the seventh result as the verification value;

The examiner points out, as shown in previous Office Actions, the teachings found in the following best art of record:

Li, US Pub. No.: 2002/0153424, teaches:

dynamically creating a verification value for a transaction using dynamic information such as the instant date and time a transaction is taking place

McGregor et al., US Pub. No.: 2002/0180584, teaches:

generating a transaction verification number specifically using a transaction counter

Buer, US Patent No.: 5,835,599, teaches:

splitting information/data blocks to be processed/encrypted
encrypting blocks with encryption keys

performing XOR operations on both unencrypted blocks of
information and on encrypted blocks of information
iteratively/repeatedly encrypting (decrypting) blocks
extracting, rearranging, and manipulating data blocks using
substitutions in conjunction with permutations, expansion permutations,
transformations, circular shifts, compression permutations, S-box
substitutions, P-box permutations, and concatenation

However, as stated above, neither Li nor any of the prior art of record teaches, to the same level of specificity and in the exact and explicit order, the claimed steps used in generating a transaction verification value as shown above. In addition, because of the nature and specificity of the claim, these specific steps are not obvious to the best nor any of the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAUL SHUMATE whose telephone number is (571)270-1830. The examiner can normally be reached on M-F 9:00AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Kramer can be reached on (571)272-6783. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
